# 7-2-2

## Organic Fertilizer

**Live Earth® 7-2-2 Organic fertilizer** is a granulated carbon-balanced formulation that combines the nutrient storage and soil amendment benefits of humate with the slow-release nutrients of organic fertilizer. Because the organic nitrogen in this fertilizer releases with microbial activity at ambient temperatures (86°F), no more than 30% of the nitrogen will be released in the first ten weeks and will continue to release organic nitrogen for the next 365 days. Released nitrogen can be stored on the humic acid molecules, which decreases nitrogen loss. This slow-release and nutrient storage prevents spikes in available nitrogen after application and instead provides a gradual conversion of protein to plant nutrients.

### Guaranteed Analysis

Total Nitrogen (N).....	7.0%
0.08% .....	Ammoniacal Nitrogen
6.15% .....	Water Insoluble Nitrogen*
0.77% .....	Other Water-Soluble Nitrogen
Available Phosphate(P2O5).....	2.0%
Soluble Potash(K2O).....	2.0%
Calcium(Ca) .....	1.0%
Sulfur(S) .....	1.0%

Derived From: Feather meal, meat & bone meal, blood meal, potassium sulfate, and humic shale.

\* 6.25% Slow Release Nitrogen from feather meal and meat & bone meal.

CONTAINS NONPLANT FOOD INGREDIENT: 5% humic acid derived from humic shale

### Directions for Use

Apply 7 to 15 lbs. per 1000 ft.<sup>2</sup> (0.5 to 1.0 lb. of actual Nitrogen per 1000 ft.<sup>2</sup>). Application intervals can vary greatly depending on desired results.
